

N&P Giannaros Brothers
ENVIRONMENTAL POLICY

It is our commitment to provide our transportation services in a way that it is of the benefit of our customers, always taking measures for the protection of the environment and in compliance with the legislation, applicable regulations and other interested parties' needs and expectations.

We assure that our services are planned and performed in a standard and controlled way following specific and defined procedures in the terms of our Management System, which is consistent with the ISO 14001:2015.

The management of our Company is committed to:

- Focus on proven technologies and operating practices to realize the Company's duty of care within the community.
- Utilize the appropriate resources for the environmental protection and sustainability.
- Improve the quality of service it provides to its customers through pro-active environmental management.
- Monitor and measure the Company's environmental performance and to strive to achieve continual improvement.
- Recognize the local and wider international implications associated with wiser management of fossil fuels, water usage and pollution control both from an environmental and financial perspective.
- Comply with applicable Legislation and Regulations and other environmental requirements expressed by the identified interested parties.
- Take reasonable steps to prevent negative environmental impact to the community. In addition, it shall undertake continual monitoring to make positive improvements to reduce consumptions.
- Make all employees aware that they should recognize their duty to consider environmental impacts arising from their own actions, activities, and behaviour.

All Company personnel should focus on achieving the ongoing environmental objectives:

- Energy saving and reduction of carbon emissions as reasonably practicable.
- Constant exploration of innovative ways to further reduce consumptions.
- Increase percentage of recycling and explore ways to further reduce waste.
- Evaluate critical activities to substitute hazardous materials as reasonably practicable.
- Select and evaluate suppliers and contractors against their ability to abide with the Company's environmental requirements.
- Promotion of good environmental practices for the own personnel and contractors.
