

ROAD TRAFFIC SAFETY POLICY

It is our policy for ensuring road traffic safety to strictly adhere to the following:

- Comply with all national road traffic regulations.
- The vehicles that we use for our transportation work are maintained regularly and are in the most suitable safety condition.
- The vehicles are driven by competent and licensed drivers who have been specifically trained on them.
- All drivers are periodically trained on safe driving.
- All drivers are periodically medically tested.
- No persons irrelevant with the transportation work and no supernumeraries are boarded on the vehicles.
- Comply with speed limits while on public or private roads.
- The transported cargo never exceeds the maximum permitted load for each one of the vehicles.
- Safety distances are always kept while moving on roads or during manoeuvring and operation within loading/discharging facilities.
- During stoppage vehicles are safely immobilised.
- Use of mobile phone or other means of radio communication is strictly forbidden for the drivers. If a communication is necessary during travelling, the vehicle has to safely stop first.
- Zero tolerance in driving under the influence of drugs or alcohol.
- Hours of driving and resting are recorded by the Drivers and are monitored by the office personnel.
- Public disturbance by use of vehicle (eg extensive use of horn) has to be avoided.
- Defence driving in all cases and always with priority and respect to pedestrians.
- Vehicles licenses are kept updated and always available upon request.

The company's management is committed that we will continuously improve the Road Traffic Safety (RTS) System and our performance and that all personnel and its contractors will always adhere to the Road Traffic Safety (RTS) procedures and principles as per the ISO 39001:2012 Standard at their day-to-day activity.
